

STATE OF NEW JERSEY
DEPARTMENT OF ENVIRONMENTAL PROTECTION
(See Issuing Division below)
PERMIT

JAN 17 2003

The New Jersey Department of Environmental Protection grants this permit in accordance with your application, attachments accompanying same application, and applicable laws and regulations. This permit is also subject to the further conditions and stipulations enumerated in the supporting documents which are agreed to by the permittee upon acceptance of the permit.

Permit No. 1316-02-0015.1 FHA 020001		
Issuance Date JAN 03 2003	Effective Date JAN 03 2003	Expiration Date JAN 03 2008
Name and Address of Applicant New Jersey Department of Transportation 1035 Parkway Avenue CN 600 Trenton, NJ 08625	Name and Address of Owner	Name and Address of Operator
Location of Activity/Facility (Street Address) Lot: N/A Block: N/A	Issuing Division Land Use Regulation Program	Statute(s) NJSA 58:10A NJSA 58:16A-50
Type of Permit Stream Encroachment		Maximum Approved Capacity, if applicable

This permit grants permission to:

Perform road improvements along Federal Highway Route 9 in the vicinity of the bridge over Weamaconk Creek, and along County Route 522, in the vicinity of the Route 9 overpass, which consist of road widening and construction of a storm water outfall, in the Township of Freehold, County of Monmouth, New Jersey.

This permit is subject to the following terms and conditions:

1. This permit is revocable, or subject to modification or change at any time, pursuant to the applicable regulations, when in the judgement of the Department of Environmental Protection of the State of New Jersey such revocation, modification or change shall be necessary.
2. The issuance of the permit shall not be deemed to affect in any way action by the Department of Environmental Protection of the State of New Jersey on any future application.
3. The works, facilities, and/or activities shown by plans and/or other engineering data, which are this day approved, subject to the conditions herewith established, shall be constructed and/or executed in conformity with such plans and/or engineering data and the said conditions.
4. No change in plans or specifications shall be made except with the prior written permission of the Department of Environmental Protection of the State of New Jersey.
5. The granting of this permit shall not be construed to in any way affect the title or ownership of property, and shall not make the Department of Environmental Protection or the State a party in any suit or question of ownership.
6. This permit does not waive the obtaining of Federal or other State or local government consent when necessary. This permit is not valid and no work shall be undertaken until such time as all other required approvals and permits have been obtained.
7. A copy of this permit shall be kept at the work site, and shall be exhibited upon request of any person.
8. In cases of conflict, the conditions of this permit shall supersede the plans and/or engineering data.
9. **Limit and Extent of Approval**
 - a. This approval grants permission to the applicant and/or its agents to undertake an activity regulated by the State of New Jersey as described by the text of this permit and as detailed by the herein approved plans. Any construction, grading, removal of vegetation, or other activity at this site within or affecting a regulated flood plain, other than specifically approved by this permit or as detailed by the approved drawings, shall require additional approvals from the Department. The commencement of such regulated activities without the appropriate approvals shall be in violation of State law.
 - b. All activities authorized by this permit shall be completed within five years of the issuance date as listed on the first page of this document. At that time, this approval, if not previously revoked, shall automatically become null and void, and none of the activities referenced herein may commence or continue until a new approval has been granted by the Department.
10. **Method of Construction**
 - a. All activities approved by this permit shall be performed under the supervision and direction of a Professional Engineer licensed in the State of New Jersey, and shall be undertaken using the best management practices available. Furthermore, the site shall be subject to inspection at any time by representatives of the Department to ensure the

continuous application of the provisions of this permit.

- b. During the course of construction, neither the applicant nor its agents shall cause or permit any unreasonable interference with the free flow of the stream by placing or dumping any materials, equipment, debris or structures within or adjacent to the stream corridor. Upon completion or abandonment of the work, the applicant and/or its agents shall remove and dispose of in a lawful manner all excess materials, equipment and debris from the stream corridor and adjacent lands.
- c. All activities authorized by this permit shall be stabilized in accordance with the *Standards for Soil Erosion and Sediment Control in New Jersey* (obtainable from local Soil Conservation District offices), or equal engineering specifications, to prevent eroded soil and sediment from entering adjacent waterways and wetlands at any time during and subsequent to construction. The Department reserves the right to order the suspension of any activity if unacceptable levels of erosion or turbidity result from the same. Furthermore, the applicant shall maintain the stream corridor as shown on the approved drawing/s for either such time as is required for the channel and/or banks to become reasonably stabilized, or for one year after completion of the project (as evidenced by a Certificate of Completion), whichever period of time is longer.

11. Responsibilities of Applicant

- a. The granting of this permit does not in any way relieve the applicant and/or its agents from the responsibility for damages caused by any construction or activities hereby approved, nor does the Department accept responsibility for any structural designs.
- b. No construction authorized by this permit may begin until the enclosed **permit acceptance form** has been signed by the applicant and is returned to the Department. By signing and submitting this form, the applicant accepts this permit in its entirety and agrees to adhere to all of its terms and conditions. Please be advised that this permit may be declared null and void should it be determined that adequate measures had not been taken by the applicant and/or its agents to ensure the continuous implementation of these terms and conditions.
- c. Within ten (10) days of the receipt of this permit by the applicant, this permit shall be recorded in its entirety in the office of the County Clerk or the Registrar of Deeds and Mortgages for each county where this permit is located. Verified notice of this action shall be forwarded to the Department immediately thereafter.
- d. The enclosed **construction notice** shall be completed by the applicant or its agent and submitted to the Department at least fourteen (14) days prior to the commencement of the herein approved activities.
- e. The enclosed **completion report** shall be completed by a Professional Engineer licensed in the State of New Jersey and submitted to the Department within thirty (30) days after completion of the herein approved activities.

12. In order to protect the general game fishery resource within the Weamaconk Creek, any proposed grading or construction activities within the banks or any other stream on site are prohibited between May 1 and June 30 of each year. In addition, any activity within the 100-year floodplain or flood hazard area of this watercourse which could introduce sediment into said stream or which would cause an increase in the natural level of turbidity is also prohibited during this period. The Department reserves the right to suspend all regulated activities on site should it be determined that the applicant has not taken proper precautions to ensure continuous

compliance with this condition.

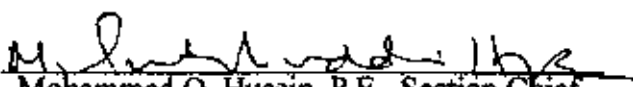

13. If dewatering is necessary for excavated areas to install structural components, or otherwise needed, the applicant shall use a temporary sediment basin for settling suspended particulates prior to discharge. The return water should be discharged in a way that will prevent scour erosion or increased turbidity where the discharge eventually enters nearby regulated areas. The areas of the waterways to receive return water from the dewatering operation should be fully enclosed with turbidity barrier to protect the fisheries.
14. Areas of excavation are to be assessed for the potential presence of acid-producing deposits and a mitigation plan, if necessary, is to be prepared in accordance with the NJDEP Technical Manual Land Use Regulation Program Bureau of Inland and Coastal Regulations, Stream Encroachment Permits Section 2.5-2 & -3, and submitted to the NJDEP for review prior to excavation.
15. From November 15 thru April 1 of each year, no work is permitted within the stream and stream banks to protect wood turtle hibernating areas. During April 1 to June 30 of each year, no work is permitted within NJDEP jurisdictional areas to protect wood turtles. Construction activities during these restricted periods can be conducted for those areas that have been surveyed for the presence of turtles at an appropriate time of year and immediately prior to their containment within silt fence enclosures to prevent turtles from reentering the construction area. The proposed methods and timing of the survey and containment perimeter of the work areas will require review and concurrence by NJDEP prior to conducting work during the restricted periods.
16. The exact placement of plant materials at the Monmouth Battlefield State Park shall be coordinated with the NJDEP Division of Parks and Forestry (Garry Stone, Principal Historic Preservation Specialist).
17. The drawings hereby approved are 12 sheets prepared by Goodkind & O'Dea, Inc., dated April 2002, unrevised, entitled:

"ROUTE 9 OVER COUNTY ROUTE 522 AND CONRAIL TOWNSHIP OF FREEHOLD
MONMOUTH COUNTY"

"CONSTRUCTION PLAN", sheets 4 of 15 through 12 of 15,

"GRADES", sheets 13 and 14 of 15, and

"CONSTRUCTION DETAILS", sheet 15 of 15.

Mohammed Q. Husain, P.E., Section Chief
Bureau of Coastal Regulation
